

# Current Energy Group

## CAPABILITY STATEMENT

SolCharge Nano, LLC /d/b/a/ **Current Energy Group** is a VOSB and HUBZone certified small business specializing in end-to-end energy solutions.

We deliver full life-cycle support for solar, battery storage, EV Charging systems, and energy generation, focusing on maximizing return on investment (ROI) and ensuring peak operational efficiency through expert installation and proactive maintenance.

We engineer and install customized power generation solutions for commercial, government, and mission-critical clients, tailored to meet specific operational and financial goals.

## OFFERINGS | SERVICES

### Energy Systems & Power Generation

- Design and installation of comprehensive Solar, Battery Storage, and EV Charging systems.
- Turnkey support for diverse power generation sources, including turbines, transformers, substations, and advanced Nuclear SMR integration.
- Procurement and integration of critical hardware including generators, rechargeable batteries, and electrical converters.

### Construction & Installation Services

- Full-scope electrical contracting and construction for power and communication infrastructure.
- General construction for commercial, industrial, and institutional building projects.
- Specialty trade services including roofing, HVAC, and plumbing.

### Engineering, Maintenance & Asset Management

- Professional engineering, R&D, and scientific consulting for energy projects.
- Proactive maintenance, performance monitoring, and repair
- Comprehensive facilities support and energy asset management to extend equipment lifespan and reduce risk.
